Building the future of pharmacy: Our strategy 2026-2028

Our four strategic priorities

1 **Establish the Royal College of Pharmacy**

2 **Become the home of pharmacy**

3 **Advance pharmacy to provide excellence in patient care**

4 **Transform member experience and engagement**

By 2028, pharmacists, pharmaceutical scientists, patients, and others across the health and pharmacy landscape will experience a College that is more...

- **Influential**
- **Visible and open**
- **Member-focused**

We will become a College that:

- **Can demonstrate its impact on patients and the public**
- **Is committed to actions, partnerships and delivery**

Our vision: Becoming the world leader in the safe and effective use of medicines
